

Dear Patient,

We hope you are having a wonderful transition into Autumn. It is time to enjoy our re-emerging freedom of movement. Finally we are back to life. Now is the time to give your skin a fresh new look.

## The Prager Approach

The Prager Clinic doctor: Dr Lizzie Tuckey conducting the Belkrya treatment on Melanie. She had four treatments over five months, with six or more weeks between them.

Safety is a something that concerns us all, be it in our daily lives and of course when it comes to medical procedures even more so.

You may have read in the recent news of the heartbreaking side effects that the CoolSculpting treatment had on the beautiful supermodel Linda Evangelista, a fat freezing procedure to reduce unwanted fat deposits under the chin.

"We used to offer CoolSculpting for a short while a couple of years ago. Admittedly, I was suckered into the marketing pitch. Not for long though. We were never sold on whether it truly works nor its safety." Dr Michael Prager.

It is natural for you to wonder, what is the safe alternative? Fortunately, we have the answer. Fat dissolving injections such as:

- Kybella
- Aqualix
- Belkrya
- Lipostabil

These are all much more effective, better value for money and far safer options.

We have done Fat dissolving injections for various medical and cosmetic reasons since 2004 with fantastic results and minimal downtime but most importantly, zero risk.

## The Prager Clinic

Dr Michael Prager & Team at The Prager Clinic

52 Beauchamp Place  
London  
SW3 1NY  
United Kingdom

contact@drmichaelprager.com

We would like to invite you to come for a consultation with Dr Michael Prager or Dr Lizzie Tuckey. We will come up with a plan that suits you for how we can get rid of some of your unwanted stubborn fatty deposits that might have bothered you for a long time already.

Fat Dissolving injections are prices:  
**Chin:** £495 per session  
**Body:** £395 per vial, a vial usually treats an area the size of your hand. Stomach for instance would start with 2 vials per treatment session.
